MIRACLE Anti-Aging Hair Shampoo

Ingredients Matter

Extraordinary Ingredients, Extraordinary Results

Hydrolyzed Quinoa: Quinoa Protein offers a unique combination of molecular weight amino acids offering enhanced penetration for hair and skin nourishment along with film forming activity for greater repair, hydration, and shine. Hair will look smoother and feel silkier; it forms a protective barrier to protect the hair from environmental stresses, retains moisture in the hair, and provides nutrients to the hair. Unlike the rest of the proteins that will each offer protection, repair, or moisturization Quinoa Protein will offer all of these attributes through enhanced hair penetration and substantivity for increased damage repair and cuticle protection.

Hydrolyzed Keratin: The true structural protein of hair. Penetrates the hair shaft to rebuild damaged hair and give it increased body. Keratin coats each individual strand of hair to strengthen and protect.

Helianthus Annuus (Sunflower) Seed Extract: Adds shine, luster and protects from harmful UV Rays. Possesses strong activity against free radicals, prolonging the color of color-treated hair.

Bee Propolis Extract: Promotes hair growth and treats damaged hair.

Argania Spinosa Kernel (Organic Argan Oil): Repairs, softens and strengthens dry, brittle, frizzy, overworked hair.

Aleurites Moluccana Seed (Kukui Nut) Oil: Strengthens the hair and provides superior shine and elasticity. Kukui Nut Oil penetrates the follicles without adding weight.

Hydrolyzed Vegetable Protein (pg-Propyl Silanetriol): coats porous and damaged areas to strengthen and mend hair fiber.

Mentha Viridis Leaf Oil (Spearmint): Oil derived from Spearmint which has been shown to be effective at stabilizing hair loss.

Lavendula Augustifolia (Lavender) Oil: Enhances blood circulation and has been shown to be effective in enhancing hair growth. Also treats dry-scalp and improves texture of hair.

Hydrolyzed Corn Protein (Capaxein) (Non-GMO): Boosts hair regeneration and targets hair cellular adhesion, communication and hair elongation.

Anti-Aging Hair Shampoo

continued

Melaleuca Alternifolia (Tea Tree) Leaf Oil: Helps remove build up on the hair shaft. Tea tree oil has the ability to normalize oily and dry hair, improving the pH balance and adding moisture or taking it away where necessary. Its antiseptic properties help unclog blocked hair

Aloe Barbadensis (Aloe Vera) Leaf Juice: Aloe Vera's alkalizing properties can help bring the scalp and hair's pH to a more desirable level, resulting in hair growth promotion, while helping the hair retain water and moisture. Also adds strength and luster to hair.

Guar Hydroxypropyltrimonium Chloride (Plant Derived): A plant derived compound that provides conditioning and detangling properties.

Panthenyl Ethyl Ether: An emollient, antistatic and conditioning agent.

Superoxide Dismutase: A potent antiinflammatory agent used to prevent hair loss and provides a protective defense against hair graying, as shown in clinical studies.

Lecithin: Supports and enhances the required amount of protein for hair growth. Improves hair growth and enhances its texture making it strong and shiny.

Vaccinium Macrocarpon (Organic Cranberry) Seed Juice: Used to enhance natural hair color. Provides conditioning benefits.

Linoleic Acid (Vitamin F): A type of omega-6 fatty acid which stimulates hair growth and nourishes the hair.

Phospholipids: Promotes hair growth. Nourishes, moisturises, cleanses and conditions the hair.

Arginine (L-Arginine): An amino acid which is effective in promoting hair growth.

Aspartic Acid (L-Aspartic Acid): Acts as a humectant and promotes growth from the hair follicle.

Glycine (Naturally Derived): An amino acid which works as a hair conditioning agent.

Disodium Cocoamphodiacetate (Plant Derived): Derived from the fatty acids found in coconut oil, this surfactant works as a mild foaming agent, cleanser and hair conditioner. As a foam booster, it increases a solution's foaming capacity by increasing the surface viscosity of the liquid which surrounds the individual bubbles in a foam. It cleans the hair by enabling water to mix with oil and dirt particles, and rinse them off the surface. It's highly valued for cleansing the hair without stripping it of its natural oils.

Silicone Quaternium-8: Provides conditioning benefits and enhances foaming. It is non-irritant.

Anti-Aging Hair Shampoo

continued

Panthenol (Pro Vitamin B5): A Clear viscous liquid that penetrates readily. Has good moisturizing & softening properties. Gives the hair moisture & shine and reduces split ends.

PPG-2 Hydroxyethyl Coco/Isoistearamide: A Foam Booster; Surfactant - Solubilizing Agent. Used to increase viscosity.

Cocamide DIPA (Sugar Derived): Acts as an emulsifier, a thickener, and as a foaming agent.

PEG-7 Glyceryl Cocoate: An emollient surfactant, foamer and conditioning compound.

PEG-16 Macadamia Glycerides: A water-soluble emollient derived from macadamia oil glycerides.

Eucalyptus Oil: Stimulates blood flow and increases hair growth. It revitalizes dull hair, treats dandruff, improves hair texture, and promotes hair elasticity and luster.

Glycerin (Plant Derived): Improves moisture and smoothness to your hair. It provides lubrication and acts as a humectant.

Sodium PCA: Works to hold water in the hair shaft. It also adds shine and bounce to the hair.

Menthol: An active ingredient which clarifies; cleaning dirt, oil, and grease leaving hair clean and refreshed. Also has scalp-stimulating effects.

Sodium Lactate: A natural humectant which draws in moisture to the hair shaft.

Sodium Lauroyl Methyl Isethionate: An extremely mild cleanser that can be used as a primary or secondary surfactant by creating a dense, luxurious foam and imparting an elegant after-feel.

Phytantriol: Helps to retain the moisture of the hair by reducing the loss of water from the hair. Lends gloss to dull and damaged hair, and increases the penetration of Panthenol and amino acids into the shaft of the hair.

Camellia Sinesis (White Tea) Leaf Extract: An antioxidant that helps safeguard against environmental damage and promotes the health and integrity of hair.

Anti-Aging Hair Shampoo

continued

PEG-120 Methyl Glucose Dioleate (Corn Based Thickener): A water-soluble thickener derived from corn which also provides emulsifying properties. So that hair that was previously inhibited can grow again. Also helps increase circulation at the scalp surface, which stimulates hair follicles and hair growth. Removes dead skin cells and other impurities that may be inhibiting healthy hair growth.

Citric Acid (Naturally Derived): Used to adjust the pH and to stabilize the formulation.

Tocopheryl Acetate (Vitamin E Acetate): Gives life to dull and limp hair for a fuller and lustrous hair growth.

Retinyl Palmitate (Vitamin A Palmitate)~(Sub CA Prop 65 Level): Enhances the appearance and feel of hair: it increases suppleness, sheen and body. It improves the texture of hair that has been physically or chemically damaged.

Cocamidopropyl betaine (Plant Derived): an organic compound derived from coconut oil that is used as an emulsifying agent and thickener. It also serves as an antistatic agent in hair conditioners.

Disodium Laureth Sulfosuccinate: A gentle cleansing agent found in hair care products. It also has good resistance to hard water, medium foaming ability, easiness of rinsing, good smoothness and biodegradation. It leaves hair clean and shiny.

Sodium C14-16 Olephin Sulfocinate: A mixture of long chain sulfonate salts prepared by sulfonation of C14-16 alpha olefins. Sodium C14-16 Olephin Sulfocinate is derived from coconut and used as a cleansing agent.

PEG-150 Pentaerythrityl Tetrastearate: A complex, high molecular weight ester designed as a premium performance thickener for aqueous detergent systems.

PEG-6 Caprylic /Capric Glycerides: is a blend of solubilizing agents that is used to carry the natural oils into a water-based system (such as your bath/shower).

Methylchloroisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Ascoryl Palmitate (Vitamin C Palmitate): An effective anti-oxidant which protects the hair from free radicals.

Anti-Aging Hair Shampoo

continued

Methylisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Unique Blend Of Amino Acids:

Hair protein is composed of linear amino acid chains. Amino acids work to rebuild the structure of the hair and help to prevent premature hair loss. Protects and repairs the hair follicle. Amino acids are essential for promoting healthy hair growth.

Proline (L-Proline)

Threonine (L-Threonine)

Isoleucine (L-Isoleucine)

Serine (L-Serine):

Valine (L-Valine)

Phenylalanine (L-Phenylalanine)

Alanine (L-Alanine)

Histidine (L-Histidine)

Anti-Aging Hair Conditioner

MIRACLE Anti-Aging Hair Conditioner

Ingredients Matter

Extraordinary Ingredients, Extraordinary Results

Hydrolyzed Quinoa: Quinoa Protein offers a unique combination of molecular weight amino acids offering enhanced penetration for hair and skin nourishment along with film forming activity for greater repair, hydration, and shine. Hair will look smoother and feel silkier; it forms a protective barrier to protect the hair from environmental stresses, retains moisture in the hair, and provides nutrients to the hair. Unlike the rest of the proteins that will each offer protection, repair, or moisturization Quinoa Protein will offer all of these attributes through enhanced hair penetration and substantivity for increased damage repair and cuticle protection.

Orbignya Oleifera Seed (Babasu Nut) Oil: Babassu oil is pressed from the seeds of the Babassu palm tree nuts in the Amazon regions of South America. The oil has similar properties to coconut oil. Maintains hair moisture, protects against hair loss, scalp irritations including dandruff and maintains hair health. Babassu oil conditions the hair and restores its natural shine without weighing it down.

Hydrolyzed Keratin: Hydrolyzed Keratin is a fibrous protein of the epidermis and its adnexa such as hair and nails. It enhances and strengthens the structure of damaged hair, restoring the hair polish and healthy look; besides it maintains a proper level of moisturizing.

Argania Spinosa Kernal (ORGANIC Argan) Oil: Repairs, softens and strengthens dry, brittle, frizzy, overworked hair.

Bambusa Vulgaris (Bamboo) Extract: Bamboo extract is the richest known source of natural silica. Rich in minerals and organic proteins. Helps strengthen the hair follicle and retain moisture to promote shine.

Cocodimonium Hydroxypropyl Hydrolyzed Rice Protein: Low molecular weight penetrates the hair shaft to rebuild and strengthen damaged hair. Rice Protein strengthens and expands the diameter of the hair shaft to create a noticeably thicker, more luxurious look.

Behentrimonium Methosulfate: This scientifically sophisticated ingredient is renowned for its superior detangling ability, without causing build-up on the hair. Unlike other hair detanglers, which are known for their irritancy, behentrimonium methosulfate is extremely mild, being recommended for use in baby products which are left on the skin.

Anti-Aging Hair Conditioner

continued

Helianthus Annuus (Sunflower) Seed Extract: Adds shine, luster and protects from harmful UV Rays. Possesses strong activity against free radicals, prolonging the color of color-treated hair.

Mentha Viridis (Spearmint) Leaf Oil: Oil derived from Spearmint which has been shown to be effective at stabilizing hair loss.

Lavendula Augustifolia (Lavender) Oil: Enhances blood circulation and has been shown to be effective in enhancing hair growth. Also treats dry-scalp and improves texture of hair.

Hydrolyzed Corn Protein (Capauxein) (Non-GMO): Boots hair regeneration and targets hair cellular adhesion, communication and hair elongation.

Ceramide: A type of lipid which is a natural component of the hair cuticle. Improves the scale of the hair cuticle and restores the natural properties of the hair. Produces immediate improvement in the strength and appearance of the hair. Reduces the friction coefficient of hair. By reducing the friction coefficient, ceramides reduce hair damage caused by abrasion and daily weathering.

Phospholipids: Comprised of two types of fatty acid, phospholipids play an important role in cellular regulation. Promotes Hair Growth In Vitro and In Vivo.

Linoleic Acid (Vitamin F): A type of omega-6 fatty acid which stimulates hair growth and nourishes the hair.

Biotinoyl Tripeptide-1: A protein derivative which supports fuller hair by promoting an ideal scalp skin condition for limiting hair loss. Promotes hair growth.

Panthenol (Pro-Vitamin B5): A Clear viscous liquid that penetrates readily. Has good moisturizing & softening properties. Gives the hair moisture & shine and reduces spilt ends.

Polysorbate-60: A fatty alcohol and is actually good for your hair. It helps to moisturize the hair and may promote hair growth. Also works to reduce the surface tension of creams and liquids, which aids in the process of emulsifying.

Glycerin (Plant Derived): Improves moisture and smoothness to your hair. It provides lubrication and acts as a humectant.

Tocopherol (Antioxidant): Also known as Vitamin E, improves the blood circulation in the scalp and improves the overall health of hair. Also promotes hair growth.

Anti-Aging Hair Conditioner

continued

Stearamidopropyl Dimethylamine: A naturally derived surfactant, it gives slip to hair without causing excessive build up because it is water soluble unlike oils or silicone. It helps to smooth the cuticle and prevent static build up (flyaways!).

Tocopheryl Acetate (Vitamin E Acetate): Gives life to dull and limp hair for a fuller and lustrous hair growth.

Retinyl Palmitate (Vitamin A Palmitate)~(Sub CA Prop 65 Level): Enhances the appearance and feel of hair: it increases suppleness, sheen and body. It improves the texture of hair that has been physically or chemically damaged.

Amodimethicone: Used for conditioning, and makes it easier for a comb to glide through the hair.

Superoxide Dismutase: A potent anti-inflammatory agent used to prevent hair loss and provides a protective defense against hair graying, as shown in clinical studies.

Lecithin: Supports and enhances the required amount of protein for hair growth. Improves hair growth and enhances its texture making it strong and shiny.

Ascorbyl Palmitate (Vitamin C Palmitate): An effective anti-oxidant which protects the hair from free radicals.

Sodium PCA: Works to hold water in the hair shaft. It also adds shine and bounce to the hair.

Panthenyl Triacetate: A Panthenol derivative (Vitamin B5) helps make hair look soft and healthy.

Sodium Lactate: A natural humectant which draws in moisture to the hair shaft.

Aspartic Acid (L-Aspartic Acid): An amino acid protein which promotes hair growth.

Polysilicone-15: A broad spectrum UV absorber and a photostabilizer which protects your hair from harmful UV rays.

Glycine: An amino acid which works as a hair conditioning agent.

Cetearyl Alcohol: A Naturally derived alcohol which give a smooth, soft feeling to the hair shaft by helping the cuticle to lie flat on the surface of the hair.

Polyquaternium-55: A multifunctional and hydrophobically modified polymer to provide a smooth, moisturized feel to the hair.

Anti-Aging Hair Conditioner

continued

Oleyl Alcohol: A long chain fatty alcohol used as an emulsifier.

Ethyl Linoleate: A fatty acid used for its emollient properties.

Methylchloroisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Methylisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Tetrasodium EDTA: Helps to maintain clarity, protect fragrance compounds, and prevent rancidity.

Citric Acid: Used to adjust the pH and to stabilize the formulation.

Unique Blend Of Amino Acids:

Hair protein is composed of linear amino acid chains. Amino acids work to rebuild the structure of the hair and help to prevent premature hair loss. Protects and repairs the hair follicle. Amino acids are essential for promoting healthy hair growth.

Phenylalanine (L-Phenylalaine)

Histidine (L-Histidine)

Proline (LProline)

Threonine (L-Threonine)

Isoleucine (L-Isoleucine)

Arginine (L-Arginine)

Valine (L-Valine)

Serine (L-Serine)

Alanine (LAlanine)

Extraordinary Ingredients, Extraordinary Results

Hydrolyzed Quinoa: Quinoa Protein offers a unique combination of molecular weight amino acids offering enhanced penetration for hair and skin nourishment along with film forming activity for greater repair, hydration, and shine. Hair will look smoother and feel silkier; it forms a protective barrier to protect the hair from environmental stresses, retains moisture in the hair, and provides nutrients to the hair. Unlike the rest of the proteins that will each offer protection, repair, or moisturization Quinoa Protein will offer all of these attributes through enhanced hair penetration and substantivity for increased damage repair and cuticle protection.

Hydrolyzed Corn Protein (Capaxein) (Non-GMO): Boosts hair regeneration and targets hair cellular adhesion, communication and hair elongation.

Simmondsia Chinensis (Jojoba) Seed Oil: Has a nearly identical chemical structure to the natural oils in the hair, Jojoba Oil is quickly absorbed without leaving a greasy residue. Restores moisture and adds incredible shine to the hair.

Limnanthes Alba (Meadowfoam) Seed Oil: Add shine moisture to hair and scalp made dry and brittle by the harsh process of daily washing. Provides ultimate moisturizing qualities and reduces frizz.

Crambe Abyssinica (Abyssinian) Seed Oil: An non-GMO plant oil that provides a natural luster and an emollient feeling to the hair. Light and non-greasy this oil conditions the hair repairing it from damage and split-ends.

Rosmarinus Officinalis (Rosemary) Leaf Extract: Inhibits hair loss and promotes hair growth as shown in clinical studies.

Camellia Oleifera Leaf (Green Tea) Extract: Improves blood circulation to the scalp and promotes hair growth.

Lavendula Augustifolia (Lavender) Oil: Enhances blood circulation and has been shown to be effective in enhancing hair growth. Also treats dry-scalp and improves texture of hair.

Eucalyptus (Globulus) Oil: stimulates blood flow and increases hair growth. It revitalizes dull hair, treats dandruff, improves hair texture, and promotes hair elasticity and luster.

Anti-Aging Hair Serum

continued

Aleurites Moluccana Seed (Kukui Nut) Oil: Kukui nut oil is scientifically proven to have a small enough molecule to penetrate into the hair. It strengthens the hair and gives it a lot of shine and elasticity. The fatty acids present in kukui nut make it a superior moisturizing product for dry hair.

Mentha Viridis (Spearmint) Leaf Oil: Oil derived from Spearmint which has been shown to be effective at stabilizing hair loss.

Melaleuca Alternifolia (Tea Tree) Leaf Oil: Helps remove build up on the hair shaft. Tea tree oil has the ability to normalize oily and dry hair, improving the pH balance and adding moisture or taking it away where necessary. Its antiseptic properties help unclog blocked hair follicles so that hair that was previously inhibited can grow again. Also helps increase circulation at the scalp surface, which stimulates hair follicles and hair growth. Removes dead skin cells and other impurities that may be inhibiting healthy hair growth.

Bee Propolis Extract: Promotes hair growth and treats damaged hair.

Argania Spinosa Kernal (ORGANIC Argan) Oil: Repairs, softens and strengthens dry, brittle, frizzy, overworked hair.

Hydrolyzed Vegetable Protein pg-Propyl Silanetriol: Coats porous and damaged strands to strengthen and mend hair fiber.

Panthenol (Pro-Vitamin B5): A Clear viscous liquid that penetrates readily. Has good moisturizing & softening properties. Gives the hair moisture & shine and reduces spilt ends.

Superoxide Dismutase: A potent antiinflammatory agent used to prevent hair loss and provides a protective defense against hair graying, as shown in clinical studies.

Aminopropyl Phenyl Trimethicone: Enhances the appearance and feel of hair, by increasing hair body, suppleness, and sheen, and by improving the texture of hair that has been damaged physically or by chemical treatment.

Caprylyl Methicone: A moisturizer which coats the hair shaft that nourishes hair, enhances shine, and gives a smooth polished finish.

Glycine: An amino acid which works as a hair conditioning agent.

Linoleic Acid (Vitamin F): A type of omega-6 fatty acid which stimulates hair growth and nourishes the hair.

Anti-Aging Hair Serum

continued

Phytantriol: An alcohol which has been shown to reduce the breakage of hair. Provides an overall improvement in the hair texture, prevention of split-ends and increased moisturization.

Lecithin: Supports and enhances the required amount of protein for hair growth. Improves hair growth and enhances its texture making it strong and shiny.

Phospholipids: Comprised of two types of fatty acid, phospholipids play an important role in cellular regulation. Promotes Hair Growth In Vitro and In Vivo.

Tocopheryl Acetate (Vitamin E Acetate): Gives life to dull and limp hair for a fuller and lustrous hair growth.

Retinyl Palmitate (Vitamin A Palmitate)~(Sub CA Prop 65 Level): Enhances the appearance and feel of hair: it increases suppleness, sheen and body. It improves the texture of hair

Dimethiconol: Provides the hair with a smooth, velvety feel without greasiness that has been physically or chemically damaged.

Ascorbyl Palmitate (Vitamin C Palmitate): An effective anti-oxidant which protects the hair from free radicals.

Arginine (L-Arginine): An amino acid which is effective in promoting hair growth.

Aspartic Acid (L-Aspartic Acid): An amino acid protein which promotes hair growth.

Sodium PCA: Works to hold water in the hair shaft. It also adds shine and bounce to the hair.

Sodium Lactate: A natural humectant which draws in moisture to the hair shaft.

Vaccinium Macrocarpon (Cranberry) Fruit Juice: The fruit acids in Cranberry Fruit Juice gives a shininess to the hair.

Ethylhexylglycerin: A natural preservative used as an alternative to parabens. Derived from grains and plants.

Cyclopentasiloxane: Acts as a mild water repellent by forming a protective barrier to the hair and provides a silky feel without weighing the hair down with greasy residue.

Anti-Aging Hair Serum

continued

SD Alcohol (Ethyl Alcohol): Derived from corn this alcohol is used to assist in the preservation of other ingredients. Does not dry out the hair.

Sodium Polyacrylate: A sodium salt used for its emollient properties and as a thickening agent.

Hydrogenated Polydecene: An emollient with a moisturizing effect that contributes to the easy spreading of the finished product and imparts a silky feeling to the hair. Non-irritating and non-sensitizing.

Cyclotetrasiloxane: Provides the hair with a smooth, velvety feel without greasiness.

Sodium Hydroxide (pH Modifier): Adjusts PH levels and is non-damaging to the hair.

Menthone Glycerin Acetal: A menthol derivative used as a fragrance.

Methylchloroisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Phenoxyethanol (Preservative): A chemical compound with a molecular composition that includes carbon, making it organic. It is used in organic chemistry as a glycol ether that acts as a solvent and a preservative.

Methylisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Trideceth-6: An ingredient used to keep products from separating.

Unique Blend Of Amino Acids:

Hair protein is composed of linear amino acid chains. Amino acids work to rebuild the structure of the hair and help to prevent premature hair loss. Protects and repairs the hair follicle. Amino acids are essential for promoting healthy hair growth.

Valine (L-Valine),

Threonine (L-Threonine),

Serine (L-Serine), Proline (L-Proline),

Phenylalanine (L-Phenylalaine),

Isoleucine (L-Isoleucine),

Histidine (L- Histidine)

Alanine (L-Alanine)

NEW PRODUCT

MIRACLE

Anti-Aging Hair Extreme Conditioner

Ingredients Matter

Extraordinary Ingredients, Extraordinary Results

Arctium Majus Root (Burdock Root) Extract: Improves blood circulation, decelerates hair loss, strengthens hair follicles and encourages healthy hair growth. Regulates sebaceous glands activity and has a normalizing and soothing effect on the scalp. Improves hair strength, shine, and body by helping maintain a healthy scalp and promote hair growth.

Orbignya Oleifera Seed (Babasu Nut) Oil: Babasu oil is pressed from the seeds of the Babasu palm tree nuts in the Amazon regions of South America. The oil has similar properties to coconut oil. Maintains hair moisture, protects against hair loss, scalp irritations including dandruff and maintains hair health. Babassu oil conditions the hair and restores its natural shine without weighing it down.

Crambe Abyssinica (Abyssinian) Seed Oil: An non-GMO plant oil that provides a natural luster and an emollient feeling to the hair. Light and non-greasy this oil conditions the hair repairing it from damage and split-ends.

Hydrolyzed Corn Protein (Capauxein) (Non-GMO): Boots hair regeneration and targets hair cellular adhesion, communication and hair elongation.

Hydrolyzed Soy Protein: Hydrolyzed Soy Protein increases the ability of the hair to bind moisture and specifically improves the tensile strength of hair. Enhances hair manageability, improves the body and texture of hair, improves feel and dry comb properties, contains cystine for hair strengthening and nourishment.

Loquat (Eriobotrya japonica) Leaf Extract: Studies show that the loquat leaf extract and corosolic acid relates to hair growth by regulation of several growth factors in dermal papilla cells. Loquat is a proven hair growth stimulator.

Argania Spinosa Kernal (ORGANIC Argan) Oil: Repairs, softens and strengthens dry, brittle, frizzy, overworked hair.

Aloe Barbadensis (Aloe Vera) Leaf Juice: Aloe Vera's alkalizing properties can help bring the scalp and hair's pH to a more desirable level, resulting in hair growth promotion, while helping the hair retain water and moisture. Also adds strength and luster to hair.

Anti-Aging Hair Extreme Conditioner

continued

Panax Gingseng Root: Clinical Studies have shown Gingseng Root possesses hair growth activity and can be used to treat alopecia or used as a way to make hair grow faster. One study found that significant elongations of anagen phase during hair cycle after application of FPG were evaluated by photographical and histological observations.

Hydrolyzed Quinoa: Quinoa Protein offers a unique combination of molecular weight amino acids offering enhanced penetration for hair and skin nourishment along with film forming activity for greater repair, hydration, and shine. Hair will look smoother and feel silkier; it forms a protective barrier to protect the hair from environmental stresses, retains moisture in the hair, and provides nutrients to the hair. Unlike the rest of the proteins that will each offer protection, repair, or moisturization Quinoa Protein will offer all of these attributes through enhanced hair penetration and substantivity for increased damage repair and cuticle protection.

Lavendula Augustifolia (Lavender) Oil: Enhances blood circulation and has been shown to be effective in enhancing hair growth. Also treats dry-scalp and improves texture of hair.

PEG-50 Shea Butter: A water dispersible emollient that provides the softening and skin conditioning properties associated with shea butter. Provides a soft, conditioned feel to the hair.

Cetyl Alcohol: This is a fatty alcohol that is derived from coconut and palm oils. Far from drying, this alcohol is actually an emollient (makes hair softer).

Menthol: An active ingredient which clarifies; cleaning dirt, oil, and grease leaving hair clean and refreshed. Also has scalp-stimulating effects.

Behentrimonium Chloride: A plant-based compound, made from colza oil obtained from the seeds of Brassica rapa, var. oleifera (oilseed turnip). Conditions, detangles, fights static, softens, restores, and rebuilds damaged hair.

Quaternium-91: A unique combination of conditioning agents found to soften hair, reduce combing damage and aid in the delivery of Vitamin E. Provides a variety of functional benefits that include exceptional softening and conditioning properties.

Polysorbate-60: A fatty alcohol and is actually good for your hair. It helps to moisturize the hair and may promote hair growth. Also works to reduce the surface tension of creams and liquids, which aids in the process of emulsifying.

Anti-Aging Hair Extreme Conditioner

continued

Mentha Viridis (Spearmint) Leaf Oil: Oil derived from Spearmint which has been shown to be effective at stabilizing hair loss.

Cetrimonium Methosulfate: An ammonium salt, Cetrimonium Methosulfate provides thickening, softening, antistatic, antimicrobial, emulsifying and conditioning properties to the hair.

Polyquaternium-11: Made from cellulose (a natural polymer) adds thickness to the hair and also helps make hair easier to comb.

Vicia Faba (Broadbean) Seed Extract: The extract from the Broad Bean taken from its large, flattened light green pods, is essential for boosting hair renewal and maintaining hair growth.

Calcium Pantothenate: Also known as Pantothenic Acid (Vitamin B5) is an essential vitamin for hair growth and health. Helps to restructure the hair.

Behentrimonium Methosulfate: This scientifically sophisticated ingredient is renowned for its superior detangling ability, without causing build-up on the hair. Unlike other hair detanglers, which are known for their irritancy, behentrimonium methosulfate is extremely mild, being recommended for use in baby products which are left on the skin.

Biotin (Vitamin B7): Strengthens hair strands and prevents breakage. Biotin is known to do wonders to the hairshaft promoting healthier hair growth and overall hair condition.

Panthenol (Pro-Vitamin B5): A Clear viscous liquid that penetrates readily. Has good moisturizing & softening properties. Gives the hair moisture & shine and reduces split ends.

Niacinamide (VitaminB3): Conditions the hair and works to fight hair loss.

Stearamidopropyl Dimethylamine: A naturally derived surfactant, it gives slip to hair without causing excessive build up because it is water soluble unlike oils or silicone. It helps to smooth the cuticle and prevent static build up (flyaways!).

Cetearyl Alcohol: A Naturally derived alcohol which give a smooth, soft feeling to the hair shaft by helping the cuticle to lie flat on the surface of the hair.

Anti-Aging Hair Extreme Conditioner

continued

Disodium Succinate: A disodium salt used as a surfactant (surfactants degrease and emulsify oils and fats and suspend soil, allowing them to be washed away).

Glycerin (Plant Derived): Improves moisture and smoothness to your hair. It provides lubrication and acts as a humectant.

PEG-12 Dimethicone: A polymer used as a conditioning agent and emulsifier to promote spreadability, and to add lubrication.

Amodimethicone: Used for conditioning, and makes it easier for a comb to glide through the hair.

Zinc Gluconate: Zinc Gluconate is the zinc salt of gluconic acid. Works to prevent hair thinning and helps to limit hair loss.

Citric Acid: Used to adjust the pH and to stabilize the formulation.

Methylchloroisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Methylisothiazolinone: A compound which is antibacterial and antifungal to prevent bacteria formation.

Unique Blend Of Amino Acids: Hair protein is composed of linear amino acid chains. Amino acids work to rebuild the structure of the hair and help to prevent premature hair loss. Protects and repairs the hair follicle. Amino acids are essential for promoting healthy hair growth.

Citrulline

Arginine (L-Arginine)

Ornithine (L-Ornithine)

Tyrosine (L-Tyrosine)

A note from *The Anti-Aging Analyst*:

The Anti-Aging Analyst is a user and authorized reseller of Miracle Holocuren products. These hair products are also used and endorsed by Terri Nunn, lead singer of the band Berlin.

For fine hair, it is recommended that you use the Extreme Conditioner as a shampoo and also a conditioner. Really!

This line is formulated by Robert Heiman, who created the company Epicuren Discovery Skincare and formulated all of their products. He is a veteran master formulator of all-natural and organic products.

The corn extract in this product is made from NON-GMO corn.
